ABOUT US:

Since 2001 we have been committed to developing the best and most effective custom-made netting for customers around Australia and the world.

Our invaluable experience working in the netting industry has enabled our professional team to provide companies with netting solutions for enhanced safety and security to their employees, facilities and customers.

Every custom-made net is designed and manufactured to the individual demands of the task required, giving the specific solution the job calls for, something stock standard items from a large retailer simply can not provide.

Being a proudly owned and operated Australian company, we use quality, locally sourced materials and services. All our netting products are designed and manufactured locally to the highest standard. Our focus is on providing you with a Personalised Solution that is Safe and of the Highest Quality.

NETTING.com.au

POLYETHYLENE:

Polyethylene netting is an extremely popular and versatile netting type that has many applications, including the following:

- **Sporting:** cricket practice nets, indoor sports, soccer nets, golf practice netting
- **Safety:** playgrounds, crowd control, barrier fencing
- **Bird Control:** knotless polyethylene

Polyethylene netting is long lasting, UV protected, and extremely tight knotted to ensure the integrity of the net over time.

It is generally available in the following apertures; 22mm, 25mm, 45mm and 100mm.

DAVID SULLIVAN
0413 940 722

AFL: BEHIND GOAL NETTING

Behind the goals nets are used as a safety barrier net and is for spectator protection at a football game. Our goal nets are visually unobtrusive so they won't interfere with game time proceedings but offer high safety standards required by AFL club presidents everywhere.

The net also stops footballs being kicked outside the field into the carpark or bush.

NETTING.COM.AU can manufacture nets in various widths and heights to suit the specific requirements of your club's sports oval. We will design and manufacture the nets specifically to meet your AFL football goals netting requirements.

NETTING.com.au

CRICKET (outdoor):

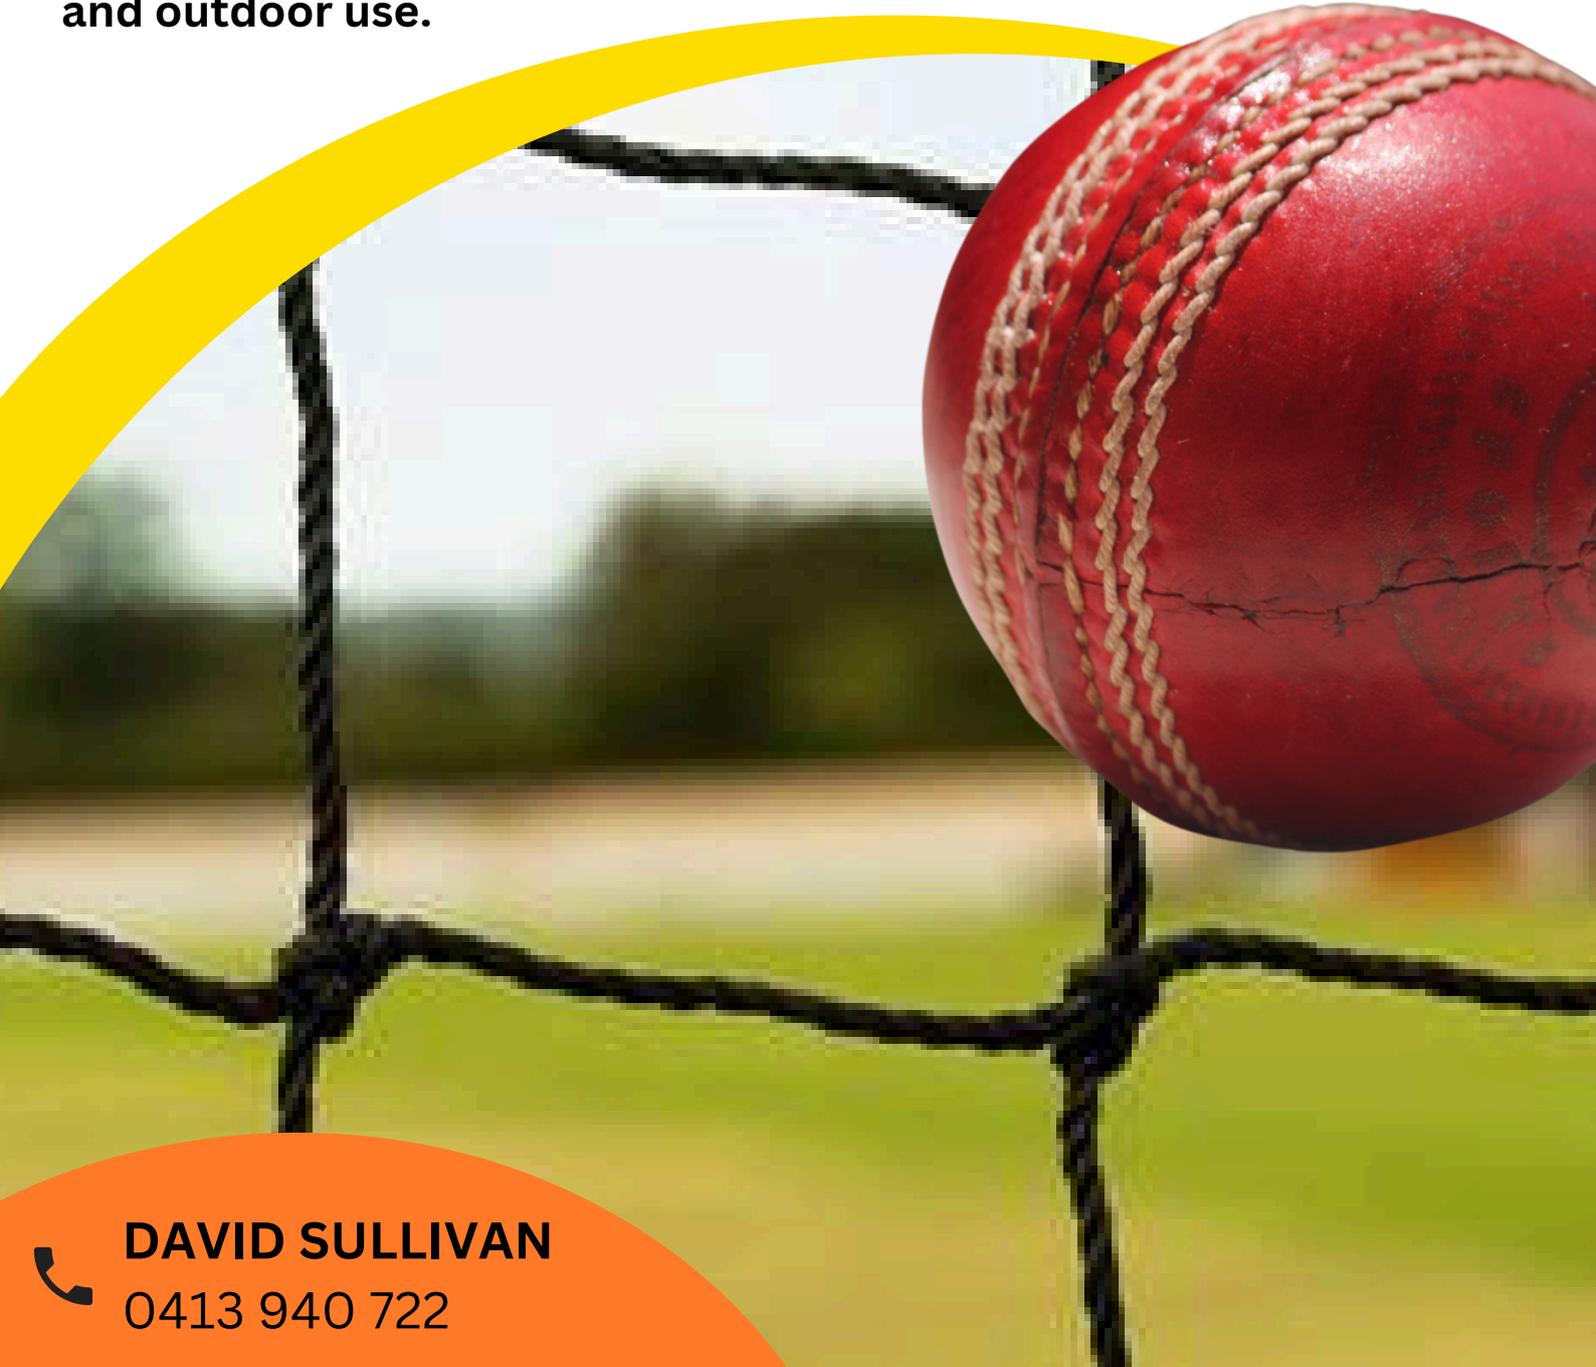

All cricket nets are manufactured here within Australia. NETTING.COM.AU

work with you from the initial design to installation to create a cricket netting system tailored to fit into your budget and requirements.

These nets are made out of Braided High Density Polyethylene generally with a 45mm square 48ply mesh with an 8mm UV-treated rope edge around 3 sides and a 16mm hand stitched rope edge along the bottom. Alternatively, these nets can be manufactured out of 36ply, 48ply or 60ply. The net is hung loose and not too taught to catch the cricket ball and prevent rebound.

Our cricket netting is durable, UV-stabilised and suitable for indoor and outdoor use.

DAVID SULLIVAN

0413 940 722

CRICKET (indoor):

NETTING.COM.AU stocks a wide range of indoor nets for cricket which ensures batting and bowling practice sessions can continue all year round.

Manufactured from ultra-durable materials, we have the best indoor cricket nets that can be customised to meet your exact requirements.

An indoor cricket net is the most crucial component of an indoor facility. They offer a controlled and safe environment for players to practice their skills and protect the area from any stray balls, reducing the risk of injuries.

They are made from high-quality polyethylene which is durable and can withstand the impacts of cricket balls.

It's important to select the right size net for your facility as there are many sizes and dimensions of indoor cricket nets.

NETTING.COM.AU NOW SUPPLIES AND INSTALLS A RANGE OF SYNTHETIC TURF.

NETTING.com.au

CURTAIN NET (Hand Drawn):

NETTING.COM.AU are the specialists of Gym Divider Curtains. Our curtain divider nets are 100% Australian made, durable for Australian conditions and are customised to fit any area. Divider nets are an important part of many sports centres/halls and can be used indoors or outdoors for a variety of sports including soccer, basketball, cricket and more.

The versatility of the curtain divider nets are the perfect solution for maximising the use of space without expanding or rebuilding.

The net allows large open spaces to be divided into smaller sections creating a visual barrier courts/areas. This solution increases privacy between the spaces and minimises distractions between spaces and minimises distractions between the courts.

DAVID SULLIVAN

0413 940 722

CURTAIN NET (Track System):

Our sliding track system comprises of a range of profile track sizes and components that holt together to facilitate movement for the opening and closing of curtain nets. The track system can either be straight or curved depending on your requirements. They can be used for internal or external applications & have a variety of fixing methods.

There are many advantages of using [NETTING.COM.AU](https://www.netting.com.au) Hand-drawn Track system:

- Easy to install, extend or move
- Free running, minimal force required
- Low maintenance
- High reliability
- Easy operation
- Tapered edge track profiles
- Compact size - allowing for space utilisation
- Track profile designed to reduce build up of dust or grime

CURTAIN NET (Motorised):

Our Curtain Divider Nets are 100% Australian-made, durable for all weather conditions & customised to fit any area. Curtain Divider Nets are an important part of many sports facilities & can be used indoors or outdoors for a variety of sports including soccer, basketball, cricket & more.

The versatility of a Curtain Divider Net proves they are the perfect solution for maximising the use of space without expanding or rebuilding. The nets allow large open spaces to be divided into smaller sections creating a visual barrier between courts/area. This solution increases privacy between the spaces & minimises distractions between the courts.

Curtain Divider Nets also increased safety by containing airborne objects causing hazards to other players & spectators.

NETTING.COM.Au use state of the art electric winches, which are rated to deliver 1800lbs of torque at 10pm.

All main frame components are e-coated and all exposed sub-components are plated for maximum corrosion protection.

SCAN ME:

NETTING.com.au

GOLF:

Our golf netting is UV stabilised, high strength netting suitable for permanent outdoor installations. This includes use on driving ranges or as barrier netting to protect car parks or to prevent stray shots leaving a golf course into road traffic.

As with all of our sports netting, our golf nets are durable, robust and made to last, even in trying environmental conditions and under frequent use.

Our range includes:

- Impact driving practice nets
- Complete golf practice driving cages
- Golf Driving Range and Golf Course Barrier Netting

DAVID SULLIVAN
0413 940 722

HOCKEY:

Hockey Field nets are commonly used around the edge of the hockey field as protective netting for spectators and surrounding vehicles and buildings at a hockey game.

NETTING.COM.AU can manufacture nets in various widths and heights to suit the specific requirements of your club's sports oval.

we also specialise in manufacturing and installing barrier nets at indoor skate rinks.

This prevent any stray pucks damaging the interior or hurt spectator.

NETTING.com.au

INDOOR SPORTS:

Indoor sports nets are an essential component by of any indoor sports facility. They provide a safe & controlled environment for players to practice & hone their skills, while also protecting the surrounding area from stray balls & equipment.

One of the main benefits of indoor sports nets is their ability to increase the overall safety and security of the facility. Additionally, indoor sports nets can also be designed to absorb impact, which can help to reduce the risk of injury.

Indoor sports nets are also highly durable & long-lasting. They are made of high-quality materials, such as polypropylene, which is a resistant to wear & tear and can withstand the impact of balls or pucks. They are nets are easy to install & maintain, making them a low-cost & low-maintenance option.

When choosing indoor sports nets, it's important to choose a high-quality product that is designed for indoor use. This is because indoor nets are exposed to different conditions than outdoor nets, such as humidity & lack of natural light, so they need to be made from a special type of materials to withstand those conditions.

SYNETHIC TURF NOW AVAILABLE: SUPPLY & INSTALL

DAVID SULLIVAN

0413 940 722

SOCCER / FUTSAL:

Soccer training nets are a perfect solution for maximising the use of space without having to utilise a full sized oval. The nets can be utilised indoors and outdoors due to the nets being UV stabilised.

The training nets allow large open fields or courts to be divided into smaller sections creating a visual barrier between divided spaces. This solution increases productivity in the soccer/futsal training sessions allowing minimal interruption to other training sessions and balls are being contained within the training nets.

All nets are custom made to order to suit every last requirement.

NETTING.com.au

POLE PROTECTION PADS:

NETTING.COM.AU specialises in high quality protection pads for all your sporting needs. Our foam padding is created for indoor and outdoor usage and designed to suit all weather conditions. Our goal post padding provides a secure and safe environment for sportsman and women to compete in, ensuring their bodies and heads are protected in case of accidental contact with on-field posts.

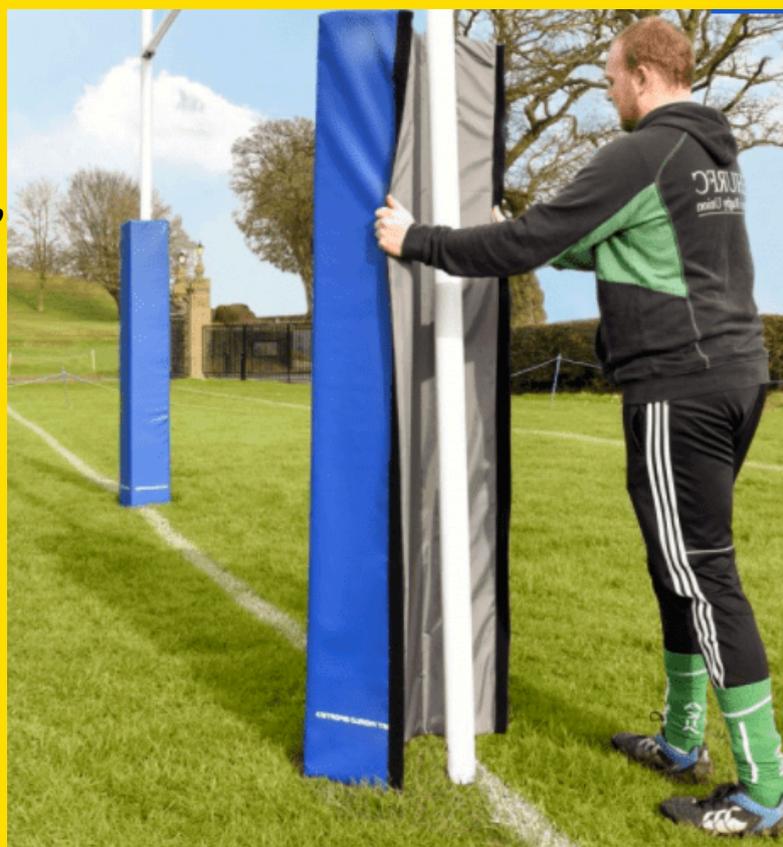

We can manufacture square or circular post protectors to your required dimensionS and they are exceptionally easy to use with little or no maintenance needed and will keep your area risk free 24 hours a day.

These protection pads are used by schools/ kindergartens, sports clubs, indoor sport centres, offices, and more.

We can stock a large variety of vinyl colours, such as Black, Blue, Yellow, Red, Green, Orange, and White.
